Manual cutter for cutting paper printouts for badges with the diameter between 25-100mm and all other shapes

W cutter

Manual cutter for cutting paper printouts for badges with diameter between 25-75mm and all other shapes

Smartphone accessories

Phones have become a very important part of our everyday lives. Their role has been constantly changing following the technological advancements and now they are no longer mere means of communication used only for calling or sending text messages. They are very often used in place of computers or credit cards. In order to meet the expectations of our clients, we have created a whole series of products which will not only decorate your phone but it will also help you keep it clean or change it into a professional GPS device by using it with a special holder for your car's vent grid.

Sticky cleaner and mobile grip

Sticky cleaner

Sticky cleaner, which can be made in any shape and size, is a practical and interesting promotional gadget for anyone. The cleaner is made of two layers: cleaning microfiber layer with a customisable full colour design and back layer made of adhesive silicone which sticks to all flat surfaces. Our cleaners are packed individually with customisable backing cards into polybags with glue.

Mobile grip

Mobile grip is a practical promotional gadget which comes in any shape and size. It is made of special silicone which prevents the phone from slipping from different surfaces. The ready-made product is packed individually into polybags with glue and includes a mobile grip and a backing card, both with full colour customisable designs.

Security products

Online spying or stealing money from contactless payment cards is nothing new. We are surrounded by technology whose constant development is not always accompanied by the development of applicable safety measures. That makes us concerned about the protection of our data and image online. Our security products will help you fight off those concerns and what is more, customise your devices with a logo or graphic design.

Data protector

Data Protector keeps all your data safe on active devices, connected with USB cable. Use at the airports, in hotels and other public USB charging stations. The Data Protector blocks data connector, it allows only the flow of current. The product available in size of 26x28mm can be printed on both sides. Protect your data against unauthorized access and malicious software by using our Data Protector!

Size: 26x28mm
